

res-bona® AR (Anti-Slip)

Transparent anti-slip finish with cleansing properties

Transparent anti-slip finish with cleansing properties

- For all smooth surfaces and tiled floors

The increase in safety

.....indoors and outdoors.

Bricks and tiles have many advantages, both visually and functionally. Above all, they are easy to clean, even with high standards of hygiene.

But they also create problems – **risk of slipping!**

Some materials are already slippery in a dry state. In wet conditions or immediately after cleaning the risk of slipping increases by several times.

res-bona® AR (Anti-Slip), the transparent, non-slip finish (with integrated cleaning properties during application) for all smooth surfaces offers assistance.

The desired slip resistance of 1:10 (strong slip resistance) to 1:100 (gentle slip resistance) can be adjusted with water.

Usage / Coverage: 1 litre = approximately 15 m²

Especially recommended for surfaces, which depend on a secure "state"!

- Hotels, restaurants, schools & churches
- Kitchen, canteens and service areas
- Entrance halls and stairwells
- Production facilities and workshops
- Dressing rooms and changing rooms
- Hospitals & operating rooms
- Shopping centres and passages
- Terrace & pool borders
- Fitness centres and solariums
- Spa, outdoor and indoor pools
- Sanitary areas
